EST 1959

SAFETY APPAREL

Serving Kansas & Nebraska Since 1959

Salina Blueprint was founded in 1959 by Calvin Stansberry and is still a family owned operation currently led by his son and wife, Gary & Karen Stansberry. Our core values of honesty and integrity remain and our corporate mission is still to provide the highest level of product and service to our clients.

Over the years, Salina Blueprint has continued to evolve the operation to include not only the finest service bureau for wide format services but also digital equipment, supplies and services for the design build industry. Salina Blueprint is an authorized reseller for leading edge equipment manufacturers including Canon, Kip, Konica-Minolta and H.P. Salina Blueprint acquired Salina Microfilm in 1987 and now operates under Salina Blueprint & Micrographic Systems. We offer service bureau for wide and small format imaging including microfilming, scanning and digital conversion services. Salina Blueprint & Micrographic Systems is a proud member of the Reprographics Services Association (RSA), a cooperative business entity incorporated in Washington, D.C. Presently, the RSA Corporation consists of 130 leading design support locations with over 3000 employees and net annual sales exceeding 300 million dollars. Strict guidelines, including financial, technical, and ethical standards are required and must be approved by the RSA Corporation before a dealer can be a member of the RSA team.

brand introduction

HIGH PERFORMANCE HIGH VISIBILITY APPAREL

GSS Brand is complemented with performance fabrics to bring comfort, performance and quality together. It is the ideal choice for daily reflective protective garment with a wide assortment ranging from safety vests, T-shirts and winter garments.

We Care for Safety

BEYOND THE BASICS

ONYX collection offering high performance fabrics and unique designs. This collection offers quality with excellent value plus feature-filled styles. From snag protection ratings to ripstop and teflon coating, **ONYX** is the go-to brand for functional reflective apparel with optimal comfort and performance.

INNOVATION FOR BETTER COMFORT

- Ripstop fabrics are woven fabrics, often made of nylon, using a special reinforcing technique that makes them resistant to tearing and ripping.
- Comfort Reflective Tape provides more flexibility over solid tape.
- Teflon Coated Fabrics treated for repellency fight off dry soil and nasty, unpredictable spills and splashes, allowing liquids to bead up and roll off. Liquid spills can easily be wiped away when blotted with a clean cloth, and dry soil can be brushed off easily.
- Mix & Match A double zipper system connects the inner coat with outer shell. Matched pants available too.

ANSI/ISEA 107-2015 INFORMATION

The 2015 revision of ANSI/ISEA 107 combines the previously separate 107 and 207 standards into a single document for administrative simplicity. The new version includes a "Type" structure that keeps off-road ("Type O"), roadway ("Type R"), and public safety ("Type P") garments separate by application, and more closely aligns with the definitions and implementation of the U.S. Federal worker high visibility regulation residing in the Manual on Uniform Traffic Control Devices (MUTCD). Under the new standard, any Type R roadway garments are compliant for workers on or near a public access roadway, and Type P public safety garments add a compliance option for emergency and incident responders.

How do we make waterproof fabric?

Waterproof fabrics consist of an outer layer called the "face fabric", usually made of nylon or polyester, and a laminated coating, made of ePTFE (expanded Polytetrafluoroethylene, also known as Teflon®) or PU (Polyurethane). The purpose of the face fabric is to protect and look stylish; it's not waterproof but is treated with a solution called DWR (Durable Water Repellent) so it doesn't soak up water. The job of keeping the water out is left to the membrane, which has tiny holes too small to let liquid water enter but large enough to allow water vapor to escape.

CARE INSTRUCTIONS

Care instructions for your reflective apparel:

- Machine wash with like colors in cold water on a delicate cycle
 - You may use a mild detergent
 - No Bleach or Fabric Softener
 - Do not Iron
 - Do not Dry Clean
 - Wash the garment inside out
- Avoid washing the clothing with other garments as rough surface will damage other clothing. Do not forget to wash your vests! The dirt from work wear can diminish the intensity of the florescent color. You want the color to be as visible as possible so the vest can be effective.
